FORESTER

Forester

Westchester County Parks, Recreation and Conservation is looking to hire a Forester who will be responsible for the overall investigation, evaluation, planning, supervision, protection and management of trees and forested areas across the 18,000+ acres of the Westchester County Parks system.

Responsibilities Include:

- Develop and implement a comprehensive urban forest inventory and management plan for Westchester County lands with the goal of improving habitat and species diversity including inventorying, maintaining records, conducting inspections, prioritizing maintenance, removals and plantings.
- Develop and implement Integrated Pest and Disease Management Programs
- Provide technical assistance to other agencies, municipalities and the public about planting, tree removal, pest and disease control, firewood usage and safety practices
- Train personnel in the best practices of tree care, pesticide use, forest health and pest management
- Assist in the production planning and management of the County tree nursery
- Work as part of the Conservation Team to develop comprehensive management plans to preserve the County's natural resources
- Supervise staff, students, volunteers, and interns conducting work to achieve goals of the tree management program

Required:

- Bachelor's Degree in Forestry or related field and three years of technical forestry experience
- New York State Department of Environmental Conservation Pesticide Certification in categories 2 and 3A
- Proficient with GIS tools such as ArcPro, ESRI Field Maps, etc.
- Experience in grant writing

Salary Range: \$82,995.00 - \$110,625.00

TO APPLY: Email: PRC-jobs@westchestercountyny.gov Include a cover letter and resume
